October 11, 2005

The Outer Limit Studios has been instrumental in the development of our new website. We wanted to express to the outside community our passion and desire to further the research for this disease that we suspect is affecting so many women. Not only is The Outer Limit Studios, the development company for this project, they have agreed to provide the entire website to our non-profit organization on a pro bono basis. Their heart is in the right place and we feel confident recommending their intent and services.

Richard J. Wallace Jr., M.D.  
Chairman, Department of Microbiology
